Solution Architecture

Date	19 September 2022
Team ID	PNT2022TMID30715
Project Name	Project – Skill and job recommender
Maximum Marks	4 Marks

Solution Architecture:

A complex process with numerous sub-processes, solution architecture connects business issues with technological solutions. It intends to:

- Select the best technological remedy to address current company issues.

- Brief the project's stakeholders on the software's structure, traits, behaviour, and other features.

- Specify the features, stages of development, and requirements for the solution.

- Produce specifications for the definition, administration, and delivery of the solution.

- **Example - Solution Architecture Diagram:**

Figure 1: Architecture and data flow of the voice patient diary sample application
